

# LEADING EDGE DISPLAYS AIRCRAFT AT NBAA

The 2016 NBAA Business Aviation Convention & Exhibition was held in Orlando, FL, Nov. 1-3 at the Orange County Convention Center and at Orlando Executive Airport (ORL). This event is the country's 6th largest tradeshow and the largest in the world focused on business aviation. It is the premier event and annual meeting place for the business aviation community and brings together aviation contacts from around the world including business aircraft owners, prospective owners, manufacturers, customers, aviation enthusiasts, business leaders and government officials concerned with business aviation.

Leading Edge had two client aircraft in the static display of aircraft--a Gulfstream G550 and a Challenger 605. These aircraft were placed in the NARA (National Aircraft Resale Association) display section of the static display field. Altogether there was a total of 114 aircraft in the sold-out static display. We had good activity around the aircraft and many visitors viewing these aircraft and asking for further information. For the comfort of our visitors, Leading Edge had a tent set up, and to help visitors find our exact location we had two 17 ft. flags with our company name and logo. In front of each of our display aircraft was a large poster highlighting the main features of the aircraft. The weather cooperated and there was no rain to dampen the enthusiasm of prospective visitors.

This year's NBAA BACE was an excellent show in many ways and was also an opportunity for Leading Edge to meet with customers and network with many industry peers.

Next year NBAA-BACE will be held in Las Vegas Oct 10-12, 2017.
